

CARE MANAGEMENT

Your Care Is Our Priority

Your Primary Care Provider is excited to join the Maryland Primary Care Program (MDPCP) to further assist in improving your health. This program is designed to support our straight Medicare beneficiaries who pay directly to Medicare.

Along with the care you receive from your doctor and/or care team, Management Solutions, LLC Care Transformation Organization (MSLLC-CTO) is an organization working in supporting your doctor and/or care team to help you with your healthcare needs.

Based on your care needs, a Care Manager may be reaching out to you to help you reach your health care goals, provide assistance with helping you understand more about your medications and treatment plan, and assist with coordinating your care needs. Based on assessment of your needs, you may also have a Community Health Worker working to help connect you with community resources and services.

MDPCP Beneficiaries who wish to modify their preference regarding claims data sharing for care coordination and care management purposes should call 1-800-MEDICARE to discuss opting out.

Please contact your doctor's office to learn more about how care team can support your overall health needs.
